English Version

12.3 Rally (page 9)

The following sentences are missing, just before the Modifiers that are correctly listed:

- rally is attempted by rolling a d10 for each unit that needs to be rallied;
- the rally attempt succeeds if the modified die roll result is less than or equal to the quality of the unit, otherwise it fails;
- an unmodified roll of 0 on the d10 automatically results in a successful rally attempt.
